

NIBE ELEMENT RAILWAY SOLUTIONS

INNOTRANS 2018
18th-21st of September
Hall 25, Booth 211

We eagerly look forward to welcome you once again to the NIBE ELEMENT RAILWAY SOLUTION booth at INNOTRANS EXHIBITION in Berlin.

Intelligent Heating & Control

NIBE ELEMENT RAILWAY SOLUTIONS offers you 60 years of accumulated competence and experience in the railway sector. We are a global actor with a strong focus on sustainable energy. Our specialized R&D departments focus on continually bringing new innovative solutions to the market. Our solutions cover both infrastructure and rolling stock. We supply components as well as complete intelligent systems and software. During the exhibition we can offer you our service in, among other languages, English, German, Chinese, Swedish, Norwegian and Danish.

Looking forward to meet you !

Infrastructure

Energy saving and efficiency play a key role in all our solutions for point heating and overhead wire de-icing.

NEW ! Weather station for de-icing applications infrared snow detector with options for air temperature, rail temperature and wind speed.

NEW ! Monitoring & Control - Cloud solution including live camera and wireless communication.

NEW ! Point Heating - Complete Light Rail Solution.

Rolling Stock

Heating solutions for smooth operation and passenger comfort.

NEW! Heat efficient floor heating that saves space and improves passenger comfort.
